BSK350-03

structure
inox\matt 03

MODULE + BACKREST possible compositions

BASKET 350 + BASKET 330

BASKET 350 + BASKET 331

Maintenance

Stainless Steel

In case of exposition to weather conditions, especially in corrosive environments, (for instance near the sea), to avoid rust formation, it is recommended to wash regularly the product with mild fresh water. If the product needs a thorough cleaning, use a neutral soap (UNIVERSAL CLEANER by RODA) and warm or mild water. Dry immediately to avoid stains and halos caused by water.

Brush following the direction of polish (if the product is not painted) and use a microfiber cloth to obtain a better result. To remove eventual print on the surface, use a glass cleanser or ammonia,

rinse out accurately and dry with a cloth.

In case of persistent spots or scratches, use a specific detergent polishing product for stainless steel.

Before using it on the product, try it in a hidden part to verify its efficiency and its no-damaging effect.

Do not use metallic brushes, abrasive products, acid substances, bleach or chemical aggressive solvents.
